

UGI Utilities Inc. – Electric Division
Net Metering – Application for Service

Customer’s Name: _____

Service Point Address: _____

City: _____ State: _____ Zip: _____

Account Number: _____

Contact Person: _____

Telephone Number: _____

Address: _____

City: _____ State: _____ Zip: _____

This application is for electric service under the UGI Utilities Inc. – Electric Division (UGI) Tariff Rule 18 - Net Metering (Rule 18) for the above customer (“Customer”). The Customer qualifies for Net Metering since its generator of electricity uses as its fuel approved under the Alternative Energy Portfolio Standards Act No. 2004-213 (“Act”), solar photovoltaic, wind power, hydropower, geothermal, biologically derived methane gas, biomass energy, coal mine methane, waste coal, demand-side management, municipal solid waste, by-products of the pulping process and wood manufacturing process, integrated combined coal gasification technology or a fuel cell/distributed generation that is located on the Customer’s premises and operates in parallel with the Company’s transmission and distribution systems and is intended primarily to offset part or all of the Customer’s requirements for electricity.

The Customer-generator facility qualifies for Net Metering as it is a _____ type generator, which is one of those qualifying facilities identified in Rule 18 and restated above. Total rated generating capacity of the Customer-generator to be used and billed under the Net Metering provision, is _____ kW (Not to exceed 50 kW residential, 3 MW non-residential and up to 5 MW under certain conditions as specified in the Act).

The Customer acknowledges that it has read Rule 18 and agrees to all terms and conditions contained therein including without limitation those specified in the Company’s interconnection tariff and the Company’s interconnection requirements. The customer

agrees not to operate its generator in parallel with the Company's electrical system without specific approval in accordance with the Company's interconnection requirements.

The Customer understands and agrees that a meter, which is capable of registering the flow of electricity in each direction, must be in service at the facility. If a meter is not in service with this capability, the Customer must submit a written request to the Company, and provide reasonable time for installation and UGI will not charge the Customer generator a fee or other type of charge unless the fee or charges would apply to other customers. (The customer-generator is responsible for the customer charge, demand charge and other applicable charges under the applicable Rate Schedule.)
